

HIRENDRA

Staff Software Engineer | AI Platform | Distributed Systems | Generative AI

Bengaluru | +91-7829666686 | hirendragujjar@gmail.com

PROFESSIONAL SUMMARY

Staff Software Engineer with 10+ years of experience architecting distributed systems, enterprise AI platforms, and cloud-native applications. Currently leading engineering for production Voice AI and Agentic AI platforms at LeadSquared, delivering low-latency conversational AI, autonomous workflows, and scalable backend infrastructure. Proven track record of architecting systems supporting enterprise customers, mentoring engineering teams, and delivering measurable improvements including 40% latency reduction, 30% infrastructure cost optimization, and AI platform modernization.

TECHNICAL SKILLS

- Programming Languages:** Java (8–24), Python, Go
- Backend & Frameworks:** Spring Boot, Spring AI, Micronaut, Quarkus, FastAPI, REST APIs, GraphQL, Microservices
- AI & Generative AI:** LLMs, Agentic AI, Voice AI, RAG, LangGraph, LangChain, Prompt Engineering, AI Agents, Tool Calling, Semantic Search, Vector Databases, Amazon Bedrock, OpenAI, Claude, Gemini
- Voice AI:** Pipecat, LiveKit, WebRTC, STT/TTS Pipelines, Streaming AI, Telephony Integration, WebSocket
- Distributed Systems:** Kafka, Kafka Streams, Redis Streams, RabbitMQ, Event-Driven Architecture, Asynchronous Processing
- Databases:** PostgreSQL, MySQL, MongoDB, Cassandra, Redis
- Cloud & Ops:** AWS, Azure, Docker, Kubernetes, CI/CD, ELK Stack, Prometheus, Grafana
- Architecture:** System Design, Distributed Systems, Scalable Systems, High Availability, Fault Tolerance, Performance Optimization, Low-Latency Systems, Design Patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

LeadSquared | Feb 2023 – Present

Bengaluru, KA

Staff Software Engineer	Jan 2026 – Present
Senior Lead Engineer	Mar 2025 – Dec 2025
Lead Software Engineer	Apr 2024 – Mar 2025
Senior Software Engineer	Feb 2023 – Mar 2024

Leading a cross-functional engineering team consisting of backend engineers, AI engineers, QA engineers, and product stakeholders. Owned end-to-end architecture decisions for enterprise AI platforms, including scalability, resiliency, observability, security, deployment strategy, and production readiness.

- Architected **Invorto**, LeadSquared's enterprise Voice AI platform enabling organizations to automate inbound and outbound customer conversations using real-time conversational AI, streaming STT → LLM → TTS pipelines, Pipecat, LiveKit, WebRTC, Amazon Bedrock, OpenAI, Claude, and Gemini.
- Designed and developed **Lumen**, an enterprise Agentic AI platform enabling autonomous execution of CRM workflows i.e lead management, report generation, customer insights, and business automation using multi-agent orchestration, tech used- langGraph, langchain, python, fastapi, boto3, bedrock, aurora postgres, redis.
- Served as Tech Lead for **Converse** and developed a no-code chatbot platform enabling business users to build conversational journeys using journey builders and conversational prompts, Tech stacks used- Spring boot, Java, Spring AI, Amazon Bedrock, PostgreSQL, Redis.
- Collaborated closely with Product, Platform, AI Research, and Engineering leadership to define architecture, technical strategy, and execution roadmap.

- Led architecture reviews, design discussions, engineering standards, and mentoring across backend and AI engineering teams.

Key Impacts:

- Reduced application latency by **40%**
- Improved AI response accuracy by **20%**
- Reduced infrastructure costs by **30%**
- Delivered 4 production AI platforms (0->1) from concept to enterprise adoption
- 100+ enterprise customers supported-
- 1000+ AI agents/bots deployed
- Handled API requests at max of 100000 RPM
- Led a cross functional team of 15+ people

GE Healthcare — Software Engineer | Mar 2019 – Feb 2022

Bengaluru, KA

Developed cloud-native healthcare platforms for processing FHIR and HL7 clinical data supporting secure, scalable healthcare interoperability.

- Designed distributed backend services using Spring Boot, Kafka, Cassandra, PostgreSQL, Redis, and REST APIs.
- Developed GraphQL APIs enabling efficient healthcare data retrieval.
- Built automated BDD testing framework using Java, Selenium, Rest Assured, and Cucumber.
- Designed storage optimization strategies reducing storage requirements by nearly 60x.
- Worked closely with product teams to deliver secure, scalable healthcare integrations.

Modivcare — Software Engineer II | Jul 2022 – Feb 2023

Bengaluru, KA

- Engineered backend microservices powering a nationwide Non-Emergency Medical Transportation (NEMT) platform, enabling reliable trip scheduling and healthcare logistics.
- Optimized application performance (made driver lookup ~45% faster) through Redis-based L2 caching and asynchronous messaging using RabbitMQ, improving scalability and system responsiveness.

One Trust — Senior Software Engineer | Feb 2022 – Jun 2022

Bengaluru, KA

- Built scalable backend services and REST APIs for the Enterprise Risk Management platform using Java, Spring Boot, and MySQL.
- Improved application reliability and release quality through performance optimization, architecture reviews, and Agile engineering practices.

Accenture — Associate Software Engineer | Jan 2016 – Mar 2019

Bengaluru, KA

- Contributed to the development and enhancement of a Java-based mortgage processing platform for Allied Irish Bank (AIB), implementing backend services and business workflows.
- Built and maintained automated testing frameworks using JUnit and Cucumber (BDD), improving application quality and accelerating regression testing.

EDUCATION

B.Tech., Computer Science & Engineering — *Institute of Engineering & Technology*

Lucknow, UP(2012–2015)

Diploma, Computer Science & Engineering — *Govt. Polytechnic*

Bijnor, UP (2009–2012)
